UI/UX – CAI

Name: Agam Jindal

Student ID: I23I0174

Section: KOI29

Activity-1

UI or UX

Good UI: Pedestrian Signal

- Clear visual symbols for stop and walk make it easy to understand.
- Countdown timer provides real-time feedback for crossing safety.
- Large, accessible button caters to all users, including those with disabilities.

Bad UI:TV Remote

- Too many similar-looking buttons cause confusion.
- Lack of backlighting makes it difficult to use in low light.
- Poor spacing increases chances of pressing the wrong button.

Good UI: Kitchen Knife

- Ergonomic handle ensures comfortable grip during use.
- Blade design balances sharpness and safety.
- Visually indicates function through material and form.

Good UI: Spice Rack

- Clearly labeled jars improve accessibility and organization.
- Consistent container design ensures a clean aesthetic.
- Supports efficiency and visual clarity in cooking environments.

Good UX: Ketchup Bottle (Upside Down)

- Gravity-fed design minimizes waste and effort.
- User-friendly — ketchup flows easily without shaking.
- Stable flat cap allows convenient storage.

Bad UX: Street Signs

- Excessive information leads to cognitive overload.
- Poor hierarchy makes it hard to locate key directions quickly.
- Distracting for both pedestrians and drivers.

Bad UX: Confusing Door Handles

- Unclear whether to push or pull, causing hesitation.
- Lack of visual cues or labels worsens user experience.
- Frequent misuse can cause frustration or accidents.

Good UX: Organized Power Dock

- Optimized layout prevents overlapping plugs.
- Neat cable management improves workspace efficiency.
- Enhances usability and aesthetics simultaneously.

Bad UX: Difficult Plastic Packaging

- Hard to open without tools like scissors.
- Sharp edges increase injury risk.
- Inconvenient design frustrates users before product use.

Bad UX: Ketchup Glass Bottle

- Requires tapping or shaking to dispense product.
- Poor flow control leads to inconsistent serving sizes.
- Not suitable for quick or one-handed use.

Activity-2

Good/Bad UI/UX in LPU

Kapurthala, Punjab, भारत 

Lit, Punjab 144411, भारत, Kapurthala, Punjab

Lat 31.258368° Long 75.706983°

Good UI: Library Signage

- Clear directional signage helps users find destinations easily.
- Readable font and high-contrast colors improve visibility.
- Well-placed arrows guide students effectively.

Good UX: Robo-Park Ground

- Ample of seating nearby provides comfort during viewing.
- Act as a common reference point for meeting and guidance.
- Accessibility for new visitors is improved for reference and finding buildings.

Bad UI: Air Conditioner Setup

- AC unit positioned high makes manual control difficult.
- Curtains obstruct airflow, reducing efficiency.
- No visible remote or smart control interface.

Good UX: Classroom Seating

- Comfortable and vibrant seating promotes relaxation.
- Ergonomic design supports long usage.
- Encourages a positive study environment.

Bad UX: Broken Dustbin

- Damaged design prevents proper waste disposal.
- Reduces usability and visual appeal of the area.
- Impacts cleanliness and overall user satisfaction.

Good UI: Faculty Attendance System

- Compact design blends with wall aesthetics.
- Clear screen visibility ensures quick attendance scanning.
- LPU branding adds familiarity and professionalism.

Good UX: Garden Area

- Well-maintained greenery creates a peaceful atmosphere.
- Paths and seating make it inviting for students.
- Flag arrangement adds a global and inclusive feel.

Bad UX: Remote Air Conditioner Units

- Poor cable management creates safety risks.
- Visually cluttered installation detracts from aesthetics.
- Difficult to maintain or clean effectively.

Good UI: Directional Board (Building 25)

- Structured layout organizes classroom listings effectively.
- Readable typography and simple icons improve clarity.
- Highlights gender-specific washrooms for convenience.

Good UI: CodeXperience Center

- Modern, clean design represents innovation and collaboration.
- Blue theme aligns with Capgemini's brand identity.
- Well-lit signage makes the area inviting.

Bad UI: Temporary Green Cover

- Visually unappealing and loosely hung fabric.
- No structural support or purpose explanation.
- Creates confusion about the area's function.

Activity-3

JOURNEY MAPPING IN THE WILD

Task: Ordering Food on Zomato

Name: Agam Jindal

Student ID: 12310174

DESCRIPTION
OF CHOSEN
ACTIVITY

- This journey maps the experience of ordering food on Zomato—from opening the app to receiving and rating the delivery. The flow highlights key decisions (searching, selecting, customizing, and paying) and the feedback mechanisms that influence confidence and satisfaction. We also note pain points like offer confusion and delivery uncertainty, and moments of delight like real-time tracking and quick checkout.

STEP 1: OPEN APP & DECIDE

- Launch the Zomato app; decide to order in
- Glance at homepage offers and cuisines
- Check delivery ETA in your area

STEP 2: SEARCH RESTAURAN T/CUISINE

- Use search bar or quick filters
- Ratings, price, and distance
- Open 2–3 promising options

STEP 3: BROWSE MENU

- Scan categories (starters, mains, combos)
- Check popular items and photos
- Compare prices and portion sizes

STEP 4: CUSTOMIZE & ADD TO CART

- Choose size/add-ons/spice level
- Note extra charges (add-ons/taxes)
- Add item to cart

STEP 5: REVIEW CART & APPLY OFFERS

- Verify items, quantities, fees
- Apply coupon or select deal/combo
- See updated total

STEP 6: CHOOSE ADDRESS & PAYMENT

- Confirm delivery address & instructions
- Pick payment method (UPI/card/COD)
- Place the order

STEP 7: TRACK ORDER

- Watch prep & pickup status
- Live rider location; ETA updates
- Respond to calls/messages if needed

STEP 8: RECEIVE & RATE

- Accept delivery; check order accuracy
- Note packaging/temperature/quality
- Rate and write quick feedback

USER JOURNEY MAP

Stages	User Actions	Touchpoints	Emotions
Open app & decide	Launch app; check offers and ETA	Zomato home, banners, ETA	Curious
Search restaurant/cuisine	Search and compare options	Search bar, filters, ratings	Hopeful
Browse menu	View categories and photos	Menu list, item photos	Interested
Customize & add to cart	Select add-ons; add to cart	Variant selectors, add button	Satisfied
Review cart & offers	Check total; apply coupon	Cart view, coupon field	Uncertain
Address & payment	Confirm address; choose payment; order	Address picker, UPI/card/COD	Confident
Track order	Follow prep & rider	Live tracking map, ETA	Anticipation
Receive & rate	Accept order; rate	Delivery handoff, rating pop-up	Happy

User Experience Over Steps

REFLECTION

- Observing the Zomato flow shows how clarity and feedback drive confidence. Search filters and ratings speed up decisions, but offer complexity or hidden fees can create hesitation. Real-time tracking and frictionless payments lift satisfaction. Design should prioritize transparent pricing, concise coupon guidance, and resilient tracking to keep emotions trending positive.

THANKYOU
